

Transition your Practice to ChenMed

Have you dreamt of having time to just care for your patients, without the administrative burden of running your practice?

If you are planning on a transition in the next 6-24 months, let's talk. We want to listen and start a conversation about options ChenMed can offer you.

ChenMed has a six-step process for parties interested in a practice acquisition, which typically takes about 90 days to complete.

- 1. Initial Discussion** - Let's get to know each other. We will set up an introductory call with one of our Directors of Practice Acquisition.
- 2. Mutual Non-Disclosure Agreement** - We want to protect your information and ours. You will provide basic high-level information regarding your practice profile (Location, Payor Mix, etc.) and we will review internally.
- 3. Due Diligence and Initial Valuation** - After reviewing the information, we will provide you with a non-binding proposal for your review and consideration.
- 4. Meet ChenMed Leaders** - You'll have the opportunity to meet with ChenMed leaders and ensure there is mutual alignment.
- 5. Final Proposal & Practice Valuation** - Customized based on discussions. If accepted, we will further review details about your practice and begin drafting legal agreements.
- 6. Closing & Integration** - We work together with you to create an integration plan that works for everyone, including your staff and your patients.

Contact us at IMG@ChenMed.com or visit ChenMed.com/Practice-Acquisition for more information.
